

BS-30

BAND SAW 750mm

Marunaka

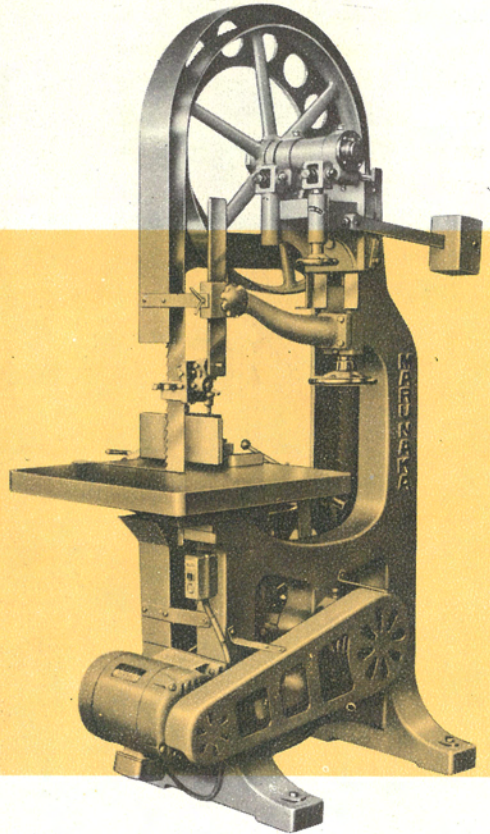

A'S BS-30 Band
utilized for saw-
boards, and scroll
blade tension de-
precision balanced
perform with effi-
accuracy.

ow has the highest
n the woodwork

FEATURE

1. The wheel is dynamically balanced for vibrationless effect and the face is smoothly ground. 15-90mm (and 100mm) width blade can be used for board sawing.
For scroll work, a fine quality hard rubber is rapped around the wheel for 7-15mm blade.
2. The wheel shaft is supported by a special precision spherical roller bearing.
3. The blade guide is specially designed to maintain blade stability.
4. Table that can be angled 45 degree to the left is available by special order.
