MARUNAKA END TENONER TN-4

MARUNAKA TEKKOSHO, INC. with long years of experience and accomplishment in wood work machinery, have greatly improved the defects of the conventional tenoner presenting our new model TN-4 TENONER with improved safety device and other features.

FEATURE

1. Superior Safety Device

Minute detail and improvement is considered, for safety, to minimize the danger of flying scraps from the cutter and saw, and to eliminate rough finish.

2. Ideally Designed to Eliminate Waste.

The machine is compactly designed for centralized operation.

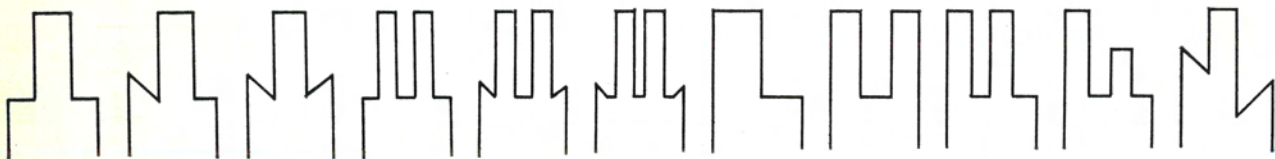

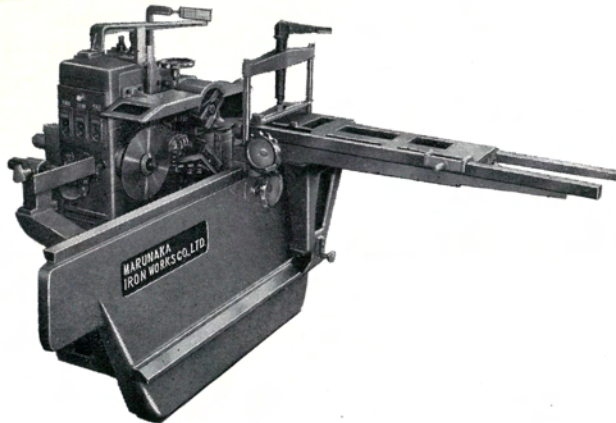

3. Exceedingly Durable

Solid single frame is used with special care on vibrating parts.

4. Correct and Nimble Operation

For correct and nimble operation, the work frame is on two rail upper and lower.

We are very proud to introduce this new feature in our TN-4 Model. The structure of this work frame is the contributing factor for quality performing tenoner.
